The Properties are Located in the Morris Heights Section of The Bronx

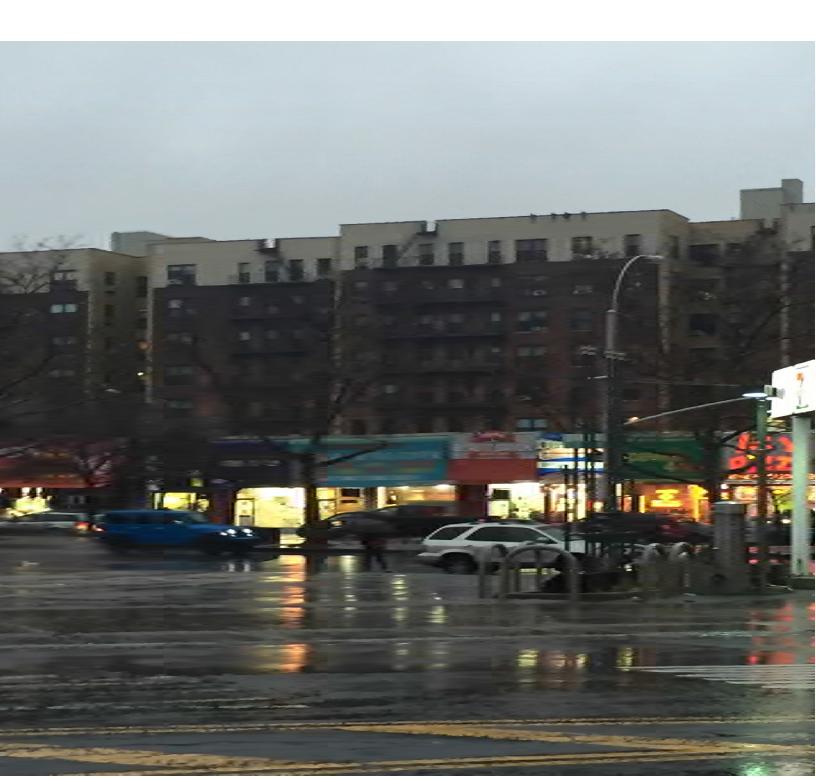

LONGARAM AT MADE MADE ANALYSIS

Morris Heights is a residential neighborhood located in the West Bronx. The neighborhood is part of Bronx Community Board 5. Its boundaries, starting from the north and moving clockwise are: West Burnside Avenue to the north, Jerome Avenue to the east, the Cross-Bronx Expressway to the south, and the Harlem River to the west. University Avenue is the primary thoroughfare through Morris Heights. The local subway is the IRT Jerome Avenue Line, operating along Jerome Avenue. ZIP codes include 10453 and 10452. The area is patrolled by the 46th Precinct located at 2120 Ryer Avenue in Fordham. New York City Housing Authority (NYCHA) property in the area is patrolled by P.S.A. 7 at 737 Melrose Avenue in the Melrose section of the Bronx.

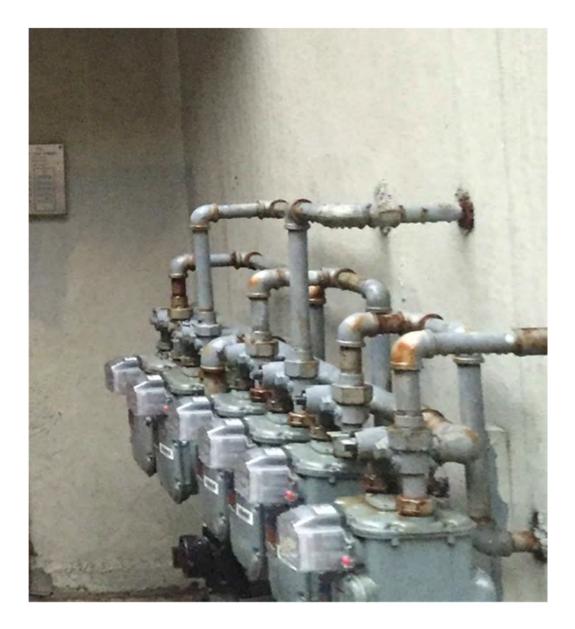

# The Buildings are Conveniently Located Next to Shopping and Public Transportation.

•Each apartment has Individual gas meters for each tenant independent gas heating and gas cooking.

•This makes the building's bottom line extremely profitable.

•Buyer is insulated from rising heating expenses.

#### The Properties are in R7-I Zone District

R7 districts are medium-density apartment house districts. The height factor regulations for R7 districts encourage low apartment buildings on smaller zoning lots and, on larger lots, taller buildings with low lot coverage. As an alternative, developers may choose the optional Quality Housing regulations to build lower buildings with higher lot coverage.

**Height Factor Regulations:** Height factor buildings are often set back from the street and surrounded by open space and on-site parking. The floor area ratio in R7 districts ranges from .87 to a high of 3.44; the open space ratio ranges from

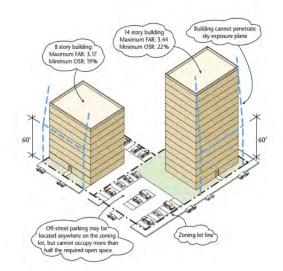

15.5 to 25.5. As in other height factor districts, a taller building may be obtained by providing more open space. For example, 76% of the zoning lot with the 14-story building is required to be open space (3.44 FAR x 22.00 OSR). The maximum FAR is achievable only when the zoning lot is large enough to accommodate a practical building foot-print as well as the required amount of open space. The building must be set within a sky exposure plane which, in R7 districts, begins at a height of 60 feet above the front lot line and then slopes inward over the zoning lot.

In R7-1 districts, parking is required for 60% of the dwelling units, and can be waived if five or fewer spaces are required. In R7-2 districts, parking is required for 50% of the units, and waived is 15 or fewer spaces are required.

**Quality Housing Option:** The optional quality housing regulations for R7 districts produce lower, high lot coverage buildings set on or neat the street line. With floor area ratios that are equal to or greater that can be achieved in height factor buildings, the optional Quality Housing regulations produce new buildings in keeping with the scale of many traditional neighborhoods.

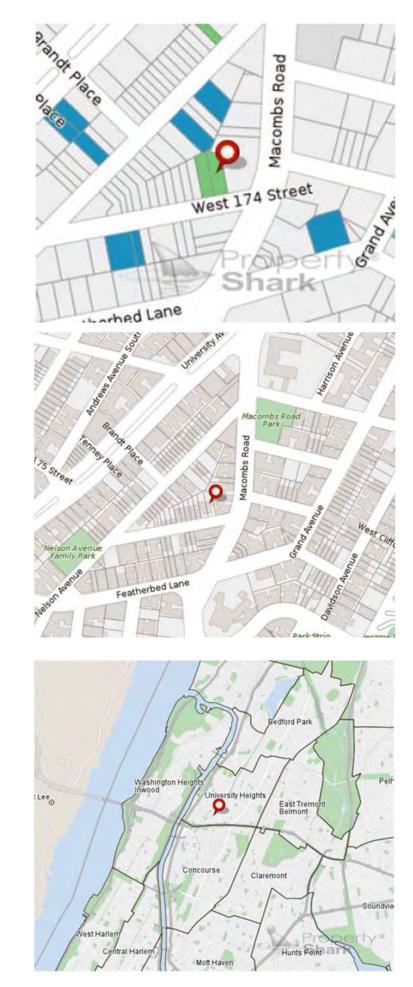

The R7 optional bulk regulations for buildings on wide streets outside the Manhattan Core are the same as those in R7A districts. The maximum FAR is 4.0 and the base height before setback is 40 to 65 feet with a maximum building height of 80 feet. The maximum FAR on buildings on narrow streets and within the Manhattan Core is 3.44 and the base height before setback is 40 to 60 feet with a maximum building height of 75 feet. Under the optional regulations, parking is required for 50% of the dwelling units in R7-1 district. Parking is waived in

			R7 Height Factor Regulations	
	FAR OSR (range) (range)		Building Height	Required Parking <sup>1</sup> (min)
R7	0.87-3.44	15.5-25.5	Governed by sky exposure planes	R7-1: 60% R7-2: 50%

In R7-1 districts, waived if 5 or fewer spaces required; in R7-2 districts, waived if 15 or fewer spaces required. On zoning lot 10,000 square feet or less, 50% in R7-1 districts and waived in R7-2 districts; on zoning lot between 10,001 and 15,000 square feet, 30% in R7-2 districts.
